JEENOKANTH G

+91 7867836030 — jeenojk01@gmail.com — github.com/gitjeeno21 — linkedin.com/in/jeenokanth21/

OBJECTIVE

Computer Science graduate with a strong foundation in Python, SQL, data analysis, and machine learning, with hands-on experience through internships and academic projects. Experienced in data cleaning, predictive modelling, and building LLM-based RAG systems. A quick learner with good adaptability, communication, and teamwork, eager to apply data science skills in a professional environment.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering 2022 – 2026
Adhiyamaan College of Engineering, Hosur. CGPA: 7.6/10

HSC, Class XII 2022
Don Bosco Matriculation Higher Secondary School, Krishnagiri. 81%

SSLC, Class X 2020
Don Bosco Matriculation Higher Secondary School, Krishnagiri. 98.2%

TECHNICAL SKILLS

Programming & Databases: Python, SQL (Oracle), MongoDB

Data Analysis: Pandas, NumPy, Data Cleaning & Preprocessing, Feature Engineering, EDA

Machine Learning: Regression, Classification, Clustering, Forecasting, Scikit-learn, Model Evaluation

Generative AI: RAG, LLMs, Embeddings, Vector Databases

Visualization: Power BI, Matplotlib, Seaborn

Tools: Git, GitHub, Jupyter Notebook

Web Development: Django, MERN Stack

INTERNSHIP EXPERIENCE

Data Analytics Intern – Solublix,Krishnagiri Jan 2026 – Mar 2026

- Analysed structured datasets using Python, Pandas and NumPy to identify meaningful patterns and insights.
- Cleaned and processed datasets to improve data quality and consistency.
- Prepared analytical reports to present findings and support internal decision-making.
- Applied analytical and problem-solving skills to transform raw data into useful information.

MERN Stack Developer Intern – Rise With Media, Krishnagiri Mar 2026 – May 2026

- Worked on web applications using the MERN stack, including frontend, backend and database integration.
- Developed and supported application features based on project requirements.
- Worked with databases and assisted with website deployment and configuration.
- Gained practical experience in troubleshooting, teamwork and delivering technical solutions.

PROJECTS

ATM Cash Optimization and Failure Prediction

- Built a data-driven solution to forecast ATM cash demand and optimize cash replenishment, helping reduce cash-outs and idle cash.
- Developed machine learning models to predict ATM failures from historical transaction and operational data, enabling proactive maintenance.
- Performed data cleaning, feature engineering and exploratory analysis, and evaluated models using appropriate regression and classification metrics.

Autonomous RAG System

- Designed and built a Retrieval-Augmented Generation system that retrieves relevant context from a document knowledge base and generates grounded answers using an LLM.
- Implemented document ingestion, text chunking, embedding generation and vector-based semantic search.
- Grounded responses in retrieved sources to improve answer relevance and reduce hallucination.

AI-Powered Training Data Curation Bot

- Developed a Python-based bot to assist in preparing structured training datasets.
- Implemented data preprocessing and text-cleaning techniques to improve dataset quality and automated data organization.

Bank Customer Churn Analysis

- Analysed customer data using Python and Pandas to identify patterns associated with customer churn.
- Performed data cleaning, exploratory analysis and visualization to understand customer behaviour and identify factors related to retention.

Exploratory Data Analysis on Sales Dataset

- Cleaned and preprocessed raw sales data to handle missing values and inconsistencies.
- Used Pandas and Matplotlib to analyse sales trends, customer behaviour, product performance and revenue patterns.

Sales & Customer Analysis using SQL

- Analysed sales and customer data using SQL queries, aggregation, filtering and joins.
- Identified top-performing products and customer purchasing patterns to generate data-driven business insights.

CERTIFICATIONS

Python Master Bootcamp – Udemy

Advanced Databases and SQL Querying – Udemy

Data Structures and Algorithms in Python – Infosys Springboard

Dynamic Web Design & Development – Infochord Technologies

PERSONAL SKILLS

Problem Solving, Communication, Teamwork, Collaboration, Adaptability, Quick Learner, Customer-Focused Approach
